

Retrieve portfolio accounting data housed in our SEI Data Warehouse. T+1 and historical data can be retrieved.

**ENDPOINT:** Transactions

**ENDPOINT DESCRIPTION:**

Returns all the transactions related data points for a particular investment product within a date range and reporting period.

**PROD URL:** <https://test.api.seic.com/v1/investments/transactions>

**TEST URL:** <https://test.api.seic.com/v1/investments/transactions>

**TLS URL\*:** <https://mtls.api.seic.com/v1/investments/transactions>

\*The TLS endpoint is only used if Server Based Application was selected during the App Registration process.

**STEP 1**

OAuth Token

Pass the OAuth Token and the App key to invoke this endpoint for a particular application.

**REQUEST PARAMETERS:**

Name	Description	Data Type	Parameter Type
Authorization	access_token value obtained from the Token endpoint.This is passed as "Bearer access_token "	string	header
AppKey	This is the Consumer Key provided during the App Registration process and is used to identify the user's application.	string	header
accountIds	SEIAccountIds for which the user has requested data. Can be individual or multiple delimited by comma.	string	query
startDate	StartDate in YYYY-MM-DD format. Will check midnight until 11:59.59.9999 of a date.	string	query
endDate	EndDate in YYYY-MM-DD format. Will check midnight until 11:59.59.9999 of a date.	string	query
dateType	The date criteria for which user wants to filter the transaction details. Ex- ActualSettlementDate, ContractualSettlementDate, EndDate, EntryDate, EventCreatedDate, KnowledgeDate, TradeDate	string	query
reportDataType	Report type(Daily/Closed)	string	query
limit	Response page size.	string	query

**SAMPLE REQUEST:**

```
curl -X GET \
'https://api.seic.com/v1/investments/transactions?accountIds=9999-3-56789&startDate=2017-01-01&endDate=2017-05-12&reportDataType=Closed&dateType=TradeDate' \
-H 'AppKey: gsedgaerhDSHGRSH' \
-H 'Authorization: Bearer ADsgdnnkfnfdIKJN'
```

**REQUEST HEADER:**

Authorization: Bearer ADsgdnkjnfIKJN  
 AppKey: gsedgaerhDSHGRSH

**RESPONSE PAYLOAD MODEL:**

Name	Description	Data Type(L)
startDate	The earliest date within a range in ISO 8601 format YYYY-MM-DD.	boolean
endDate	The latest date within a range in ISO 8601 format YYYY-MM-DD.	string
reportDataType	Report data type for investment positions, such as Closed or Daily.	string
dateType	The date criteria by which user wants to filter.	string
id	The SEI system's internal identifier for an Account, position, lot, transaction, investor, product or any other entity indicated by the object grouping in the API response.	string
name	The business description for an entity in the context of the API, sometimes called a proper name. A name can apply to a Calendar, Financial Institution, Investor, Account, Advisor and various other entities.	string
externalId	Unique business identifier that represents a contact, investor, product, transaction or alternate entity recognized by SEI and a third party system or application. Many times the externalId is used to synchronize SEI sourced data with another data source for the same record.	string
transactionsCount	Number of transactions per account in the API response.	number
accountId	SEI unique system ID that represents the account.	string(40)
alternateId	Alternate identifier. This is a secondary identifier typically used when integrating between systems. Use of this field is optional.	string (30)
description	This field holds additional information about the field, and is provided during setup.	string
tradeDate	The date the order was executed, e.g., the effective date, in ISO 8601 format YYYY-MM-DD.	string
actualSettlementDate	Settle date of transaction.	string
contractualSettlementDate	The date the transaction is expected to settle.	string
quantity	The current face amount, or quantity of shares held, for an investment or noted on a transaction.	number
comment	Free form text field available to user on most transaction types.	string
accountDescription	A short description of the account	string
cusip	A 9-digit alphanumeric securities identifier assigned by the Committee on Uniform Security Identification Procedures (CUSIP) for the purposes of facilitating clearing and settlement of trades.	string
sedol	The Stock Exchange Daily Official List (SEDOL) is a list of security identifiers used in the United Kingdom and Ireland for clearing purposes.	string
isin	The International Securities Identification Number (ISIN) is an alphanumeric code that identifies a specific securities issue.	string
ticker	A ticker symbol used to identify a stock.	string
reportDataTypeName	Report data type for investment positions, such as Closed or Daily.	string
lin	LIN	string
investmentId	The SEI system identifier that represents the investment.	number
investmentName	Name of the investment.	string

investmentDescription	The full text description of an investment.	string
brokerName	The name of the trading broker on a transaction.	string
currencyIsoName	The currency name of income payments.	string
currencyIsoCode	The currency code in which the transaction is paid in.	string
brokerCommissionAmount	The amount of brokerage commission on a trade expressed in local and base currency.	number
costAmount	Total base or local net cost of the lots being sold or purchased.	number
grossAmount	Net cash amount of a transaction less traded accrued interest and withholding tax in base and local currency.	number
incomePurchaseSoldAmount	Amount of cash paid or received to cover accrued interest on a position. Available for base and local currency.	number
netAmount	The net cash amount of a transactions after associated charges and deductions have been subtracted.	number(9)
notionalAmount	Notional exposure amount. Notional value helps distinguish the total value of a trade from the cost of taking the trade.	number(9)
priceAmount	Price of the transaction expressed in the local and base currency.	number
principalAmount	The total amount of uninvested principal cash held in an Account expressed in base and local currency.	number
realizedGainLoss	The investment gain realized when an investment is disposed expressed in base and local currency.	number
secFees	Security Exchange Commission fees applied to trades expressed in base and local currency.	number
totalGainLoss	Combined short term and long term gain loss expressed in the base and local currency.	number
otherExpense		number

**RESPONSE PAYLOAD MODEL:**

<b>Name</b>	<b>Description</b>	<b>Data Type(L)</b>
startDate	Start date of the reporting window.	string
endDate	End date of the reporting window.	string
reportDataType	Report data type for investment positions. (Closed, Daily)	string
dateType	The date criteria for which user wants to filter the transaction details. Ex- ActualSettlementDate, ContractualSettlementDate, EndDate, EntryDate, EventCreatedDate, KnowledgeDate, TradeDate	string
id	The SEI system identifier that represents the account or transaction	string
name	A single line (up to 60 characters) description of an account.	string
externalId	The client specific or external identifier that represents the account recognized by SEI and a third party system or application. Many times the externalId is used to synchronize SEI sourced data with another data source for the same records.	string
transactionsCount	Number of transactions per account in the API response	number
alternateId	An alternate identifier. In this case it is a unique number or identifier from source accounting system that uniquely identifies this Transaction.	string
type	Transaction Type	string
description	Transaction description	string
tradeDate	Settle Date of Transaction.	string
actualSettlementDate	Settle Date of Transaction.	string

contractualSettlementDate	The date the transaction is expected to settle.	string
quantity	The quantity of shares reflected in a transaction.	number
comment	Free form text field available to user on most transaction types.	string
accountId	Account Identifier.	string
accountDescription	Account Description.	string
cusip	A 9-digit alphanumeric securities identifier assigned by the Committee on Uniform Security Identification Procedures for the purposes of facilitating clearing and settlement of trades.	string
isin	The International Securities Identification Number (ISIN) is an alphanumeric code that identifies a specific securities issue.	string
sedol	The Stock Exchange Daily Official List (SEDOL) is a list of security identifiers used in the United Kingdom and Ireland for clearing purposes.	string
ticker	A Ticker Symbol used to identify a stock.	string
reportDataTypeName	Report data type for investment positions. (Closed, Daily)	string
lin	LIN	string
investmentId	The SEI system identifier that represents the investment	string
investmentName	Name of the investment.	string
investmentDescription	Description of the Investment.	string
brokerName	The name of the Trading Broker on a transaction.	string
currencyIsoName	The currency name of income payments.	string
currencyIsoCode	The currency code in which the transaction is paid in	string
brokerCommissionAmount	The amount of brokerage commission on a trade expressed in local and base currency.	number
costAmount	Total Base or Local Net Cost of the lots being sold or purchased.	number
grossAmount	Net Cash Amount of a Transaction Less Traded Accrued Interest and Withholding Tax in base and local currency.	number
incomePurchaseSoldAmount	Amount of cash paid or received to cover accrued interest on a position. Available for base and local currency	number
netAmount	Net Cash Amount of a transaction expressed in base and local currency.	number
notionalAmount	Notional Exposure Amount in base and local currency	number
priceAmount	Price of the transaction expressed in the local and base currency	number
principalAmount	The total amount of uninvested principal cash held in an Account expressed in base and local currency.	number
realizedGainLoss	The investment gain realized when an investment is disposed expressed in base and local currency.	number
secFees	Security Exchange Commission fees applied to trades expressed in base and local currency.	number
totalGainLoss	Combined short term and long term Gain Loss expressed in the base and local currency.	number
otherExpense		number
totalCount	Total number of records	number
limit	Number of records per page	number
first	API URL for the first page of data with respect to the request context	string
last	API URL for the last page of data with respect to the request context	string

previous	API URL for the previous page of data with respect to the request context	string
next	API URL for the next page of data with respect to the request context	string
self	Current Request URL	string

#### RESPONSE ERRORS:

Name	Description
200	OK- The request has succeeded and the response has been returned.
400	Bad request - The server cannot or will not process the request due to an inaccurate request submitted by the client application. Please resubmit the request after making the required corrections indicated in the error response. For more Info on SEI Error Standards please refer to the API Standards FAQ under Support.
401	Unauthorized - Invalid authentication details have been provided. Also useful to trigger an authorization pop up if the API is used from a browser.
403	Forbidden-The SEI Server understood the request but refuses to fulfill it.
404	Not Found- The requested resource or the underlying resource does not exist. Please resubmit the request after making the required corrections
500	Internal Server Error - The SEI server was unable to fulfill the request due to an unknown condition. Please contact SEI for support. For More Info please refer to the "Response & Errors" FAQ under support.
